

Solution with Total Speaker

Kit components

- Total Speaker buffer tank
- Solar collectors
- Two ways circulation station and GSPLUS solar controller
- Solar expansion tank
- Thermostatic mixer
- Antifreeze liquid
- RCPSU Connection for collectors (page 104)

- Solar kit with collector having COPPER absorber plate
- Solar kit with collector having ALUMINIUM absorber plate

With outdoor collectors - 2,5 m²

With Total Speaker buffer tank

RECOMMENDED TO USERS HAVING AN INSTANTANEOUS BOILER

On request kits can be equipped with Genius package composed of:

- diverter valve VMT003 (page 105)
- differential thermostat TD001 (page 85)

With in -roof collectors - 2,5 m²

ATTENTION in order to avoid possible water infiltration inside the flashing install in-roof collectors only with a minimum 18° tilt angle.

With Total Speaker buffer kettle

Solution with two buffer tanks (Genius)

Kit components

- Solar collectors
- Double coil BDS buffer tank
- Genius buffer tank equipped with three ways valve and differential thermostat
- Two ways circulation station and GSPLUS solar controller
- Solar expansion tank
- Thermostatic mixer
- Antifreeze liquid
- RCPSU connections for collectors (pag.104)

WARRANTY 10
copper

WARRANTY 5
aluminium

 Solar kit with collector having COPPER absorber plate

 Solar kit with collector having ALUMINIUM absorber plate

With outdoor collectors - 2,5 m²

With double coil vitrified buffer tank and Genius buffer tank

! To manage the by-pass of the instantaneous boiler we recommend

- diverter valve VMT002 (page 105)
(directly interfaced to the solar controller)

For the operating principle of the Genius buffer tank go to page 79

With in-roof collectors - 2,5 m²

ATTENTION in order to avoid possible water infiltration inside the flashing install in-roof collectors only with a minimum 18° tilt angle.

With double coil vitrified buffer tank and Genius buffer tank
